

TIME

Digital account units

Time Mining LTD

TIME - Issue and accounting depends on the number of operations conducted per second by the information processing device.

The functioning of the system is based on the law of Moore, as currently drafted says: The number of transistors on the integrated circuit chip doubles every 18 months.

- ✓ - Encrypted connection channel
- ✓ - Multi-threaded operation mode
- ✓ - Low Priority CPU / GPU mode

TIME Application - Software converting active transistors from IPS carrier device (Instructions per second) into current second of time.

TIME NETWORK transmission channel

Every second billions of computers around the world transmit information generated by transistors, but certain fee is required for Internet connection. What if the network itself pays for connection?

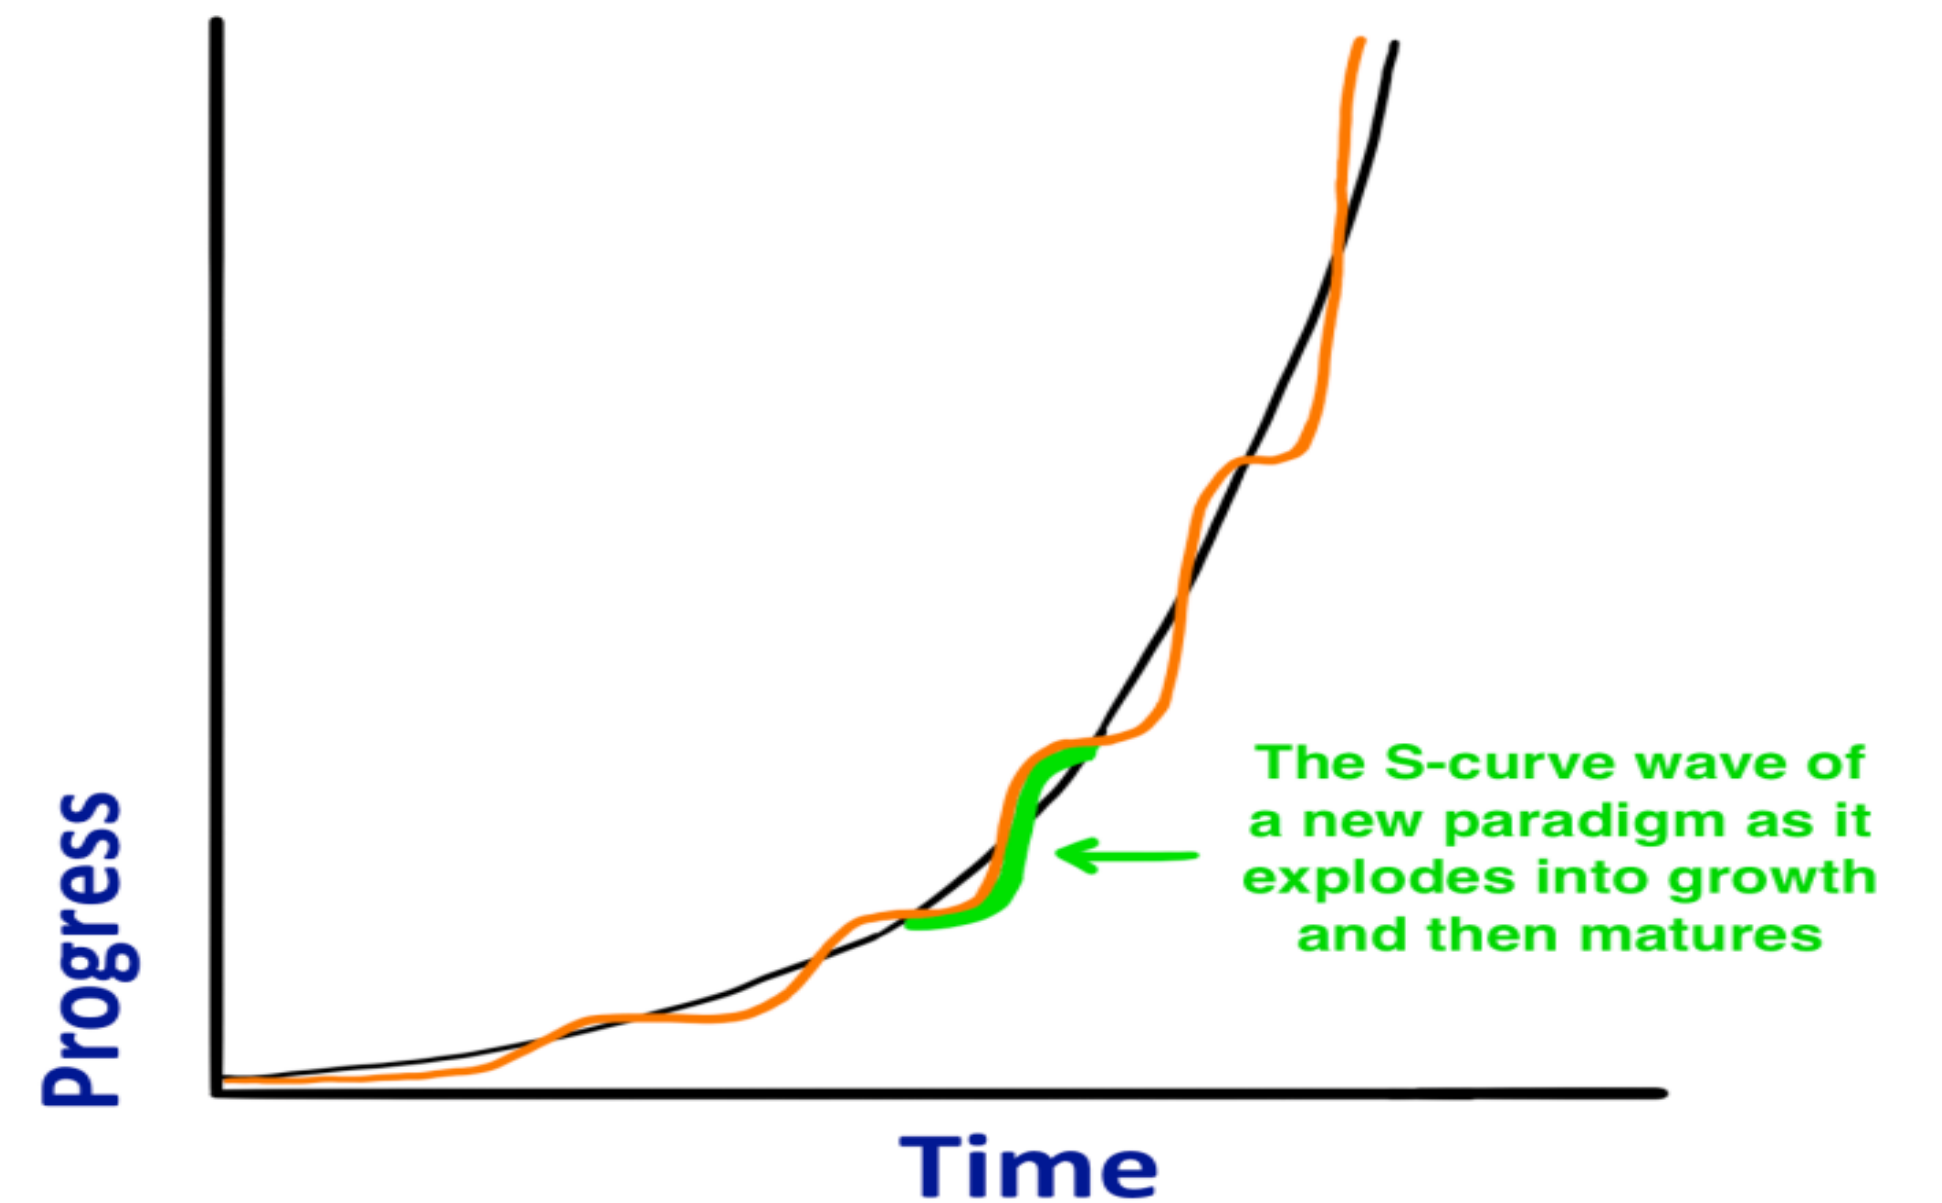

REWARD SYSTEM

- ✓ - Instant transactions
- ✓ - High reward rate
- ✓ - Safety

Software gets from transistors 1 IPS (Information block), the value is equal to 2^{-17} TIME per second

Each transistor unit, connected to TIME network gets a reward for each IPS/sec (Instructions per second)

Each data flow causes the decline of the reward by the system, so the next reward gets more expensive on the market

Reward Table

	2017	2020	2025
1000GIPS/sec*month	50 Time	6,25 Time	0.1 Time
Rate Time	\$5	\$50	\$2500
Profit %	40%	1000%	50000%

Business Model

Extraction of encrypted and limited in quantity crypto-currency program code is generated by the choice of numerical variations.

Get TIME and alternative crypto currency without investing in equipment, noise and energy costs.

We developed a convenient business model, providing lease technical capacity for mining on profitable conditions. Easy to understand and profitable business model Time Mining will open new opportunities for you to earn money the digital age

Exclusive Terms of Cooperation

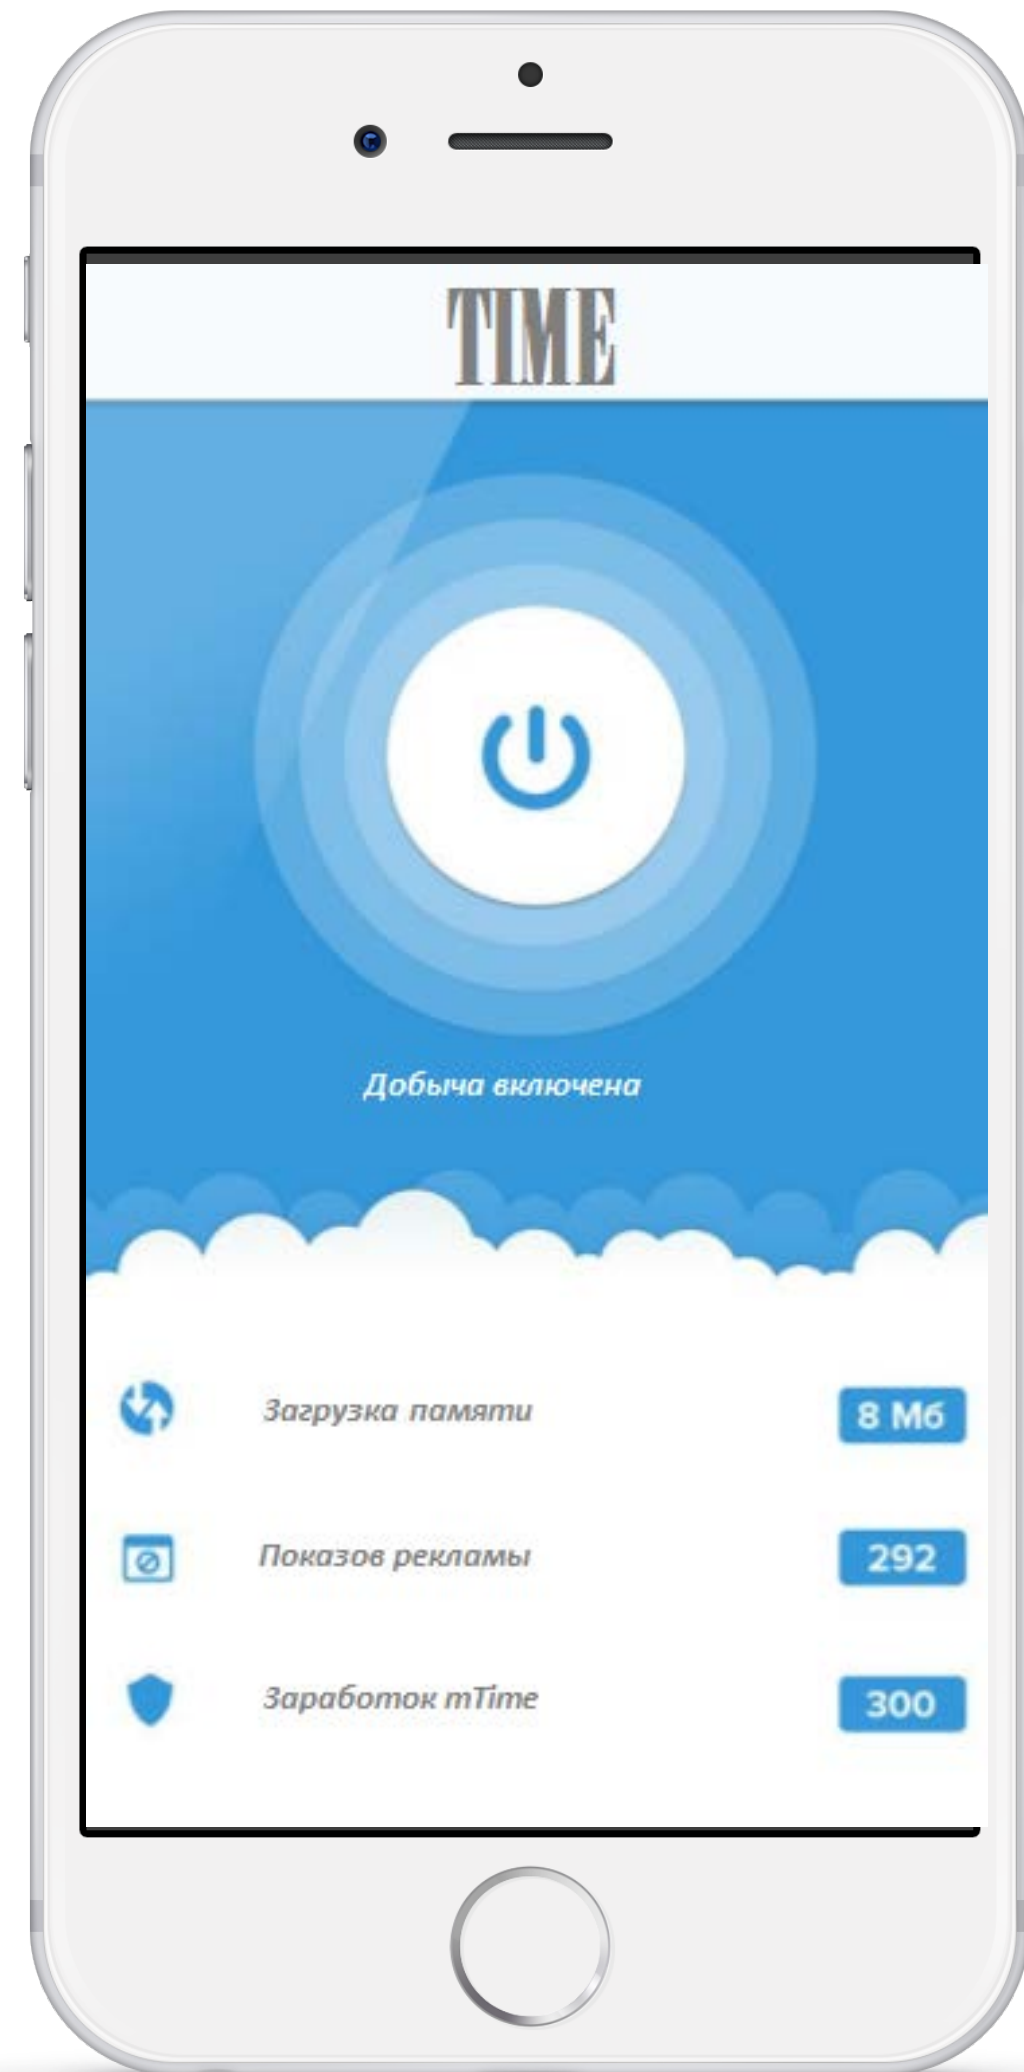

We use cheap electricity, maximum efficient assembly of equipment based on popular algorithms sha-256, scrypt, daggerhashimoto, which is profitable for investors.

Time Mining

Each network user can purchase license key for extraction of Time. Mining is available to everyone, anyone can benefit from using the resources of their PC starting to earn with TIME.

Time Manager

Earn mTime on your mobile device, exchange mTime with friends, earn from inviting partners and their earnings, translate mobile tokens into real things or money

TIME Network Technology

New technological solutions presented by Time Mining Ltd allow all participants who connect to our network earn constantly progressive income.

Join and become a member of our network right now!
